Reasons for requesting cancellation of the Penalty Charge Notice

I received the above parking notice today and I wish to contest it.

I admit that our car was where you photographed it but I do not admit that our car was parked there at all. I know your photographers were there because I saw their white vans and they know we were not parked there because they saw us there loading and then later unloading a package. The package was our distressed cat who we transported to and from the vet that morning. This was in fact an emergency.

Accordingly we needed to load Charlie into the car and unload Charlie out of the car in this position. On both occasions we caused no obstruction whatsoever. On both occasions your white van spy cam passed by and watched this happen. Had your vehicles actually stopped, they would have been in a position to make a reasonable judgement about the matter, but they did not stop.

Both the loading and the unloading was carried out as fast as possible and in the only way possible. There was no alternative method of getting Charlie to the vet.

You only wish to claim that you observed "parking" for two minutes however the only evidence you have provided shows the car in this position for an instant, and as you can see the car is occupied and may well be moving when this photograph was taken.

I believe you have therefore made an unfair charge and I therefore would ask you to remove it.
